

INTRODUCING

The *Intelligent* Intake Platform for Aesthetic Clinics

Replace your contact form with an AI-powered consultation engine that pre-qualifies patients, scores leads, and delivers clinical profiles — before you pick up the phone.

AI-POWERED

HIPAA COMPLIANT

CRM INTEGRATED

WHITE-LABEL READY

THE CHALLENGE YOU FACE EVERY DAY

Your team spends most of their time on *unqualified leads*

BASIC CONTACT FORMS

All you get is a name, email, and "I want rhinoplasty." No context. No readiness signal. No clinical information.

COORDINATOR BOTTLENECK

Staff spend 15–20 minutes per lead call just gathering basic history — history the patient could have provided themselves.

HIGH NO-SHOW RATE

Patients book consultations without real commitment. Surgeons prepare, coordinators block time — and the patient doesn't show.

The result: your team is reactive, not proactive. High-intent patients get the same treatment as tire-kickers — and your best leads often fall through the cracks.

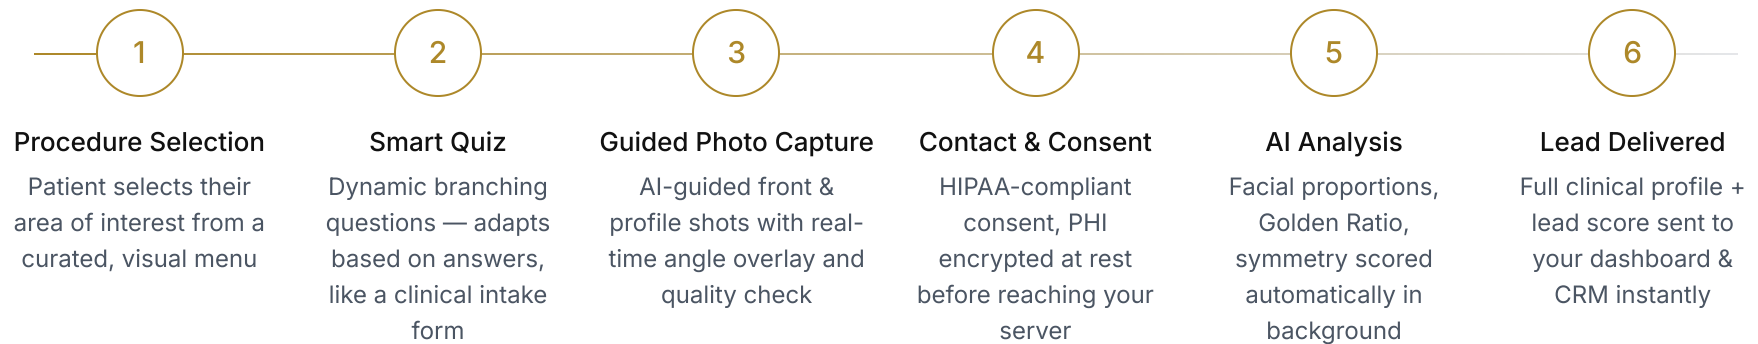

SIDE-BY-SIDE COMPARISON

Contact Form vs. *Smart Intake Engine*

TOUCHPOINT	TRADITIONAL CONTACT FORM	AESTHETICAI SMART INTAKE
What you capture	Name, email, "interested in..."	Full clinical history, AI-analyzed photos, readiness score, procedure match
Lead qualification	None — all leads look the same	Automatically scored 0–100 & prioritized: Urgent / High / Medium / Standard
Photo analysis	No photos, or unstructured attachments	Guided photo capture with Golden Ratio & facial proportion analysis
Coordinator workload	20 min/call gathering info that patient already knows	Pre-op brief ready before the call. Coordinator sees everything instantly.
Patient commitment	One click — zero investment	Multi-step process builds commitment. Higher intent = fewer no-shows.
Availability	Form collects; staff follows up during business hours	24/7 fully automated intake — leads processed while you sleep
CRM sync	Manual data entry	Auto-webhook to Nextech, PatientNow, HubSpot on submission

WHAT AESTHETICAI DOES

An intelligent intake experience that *qualifies, educates & commits*

The entire flow takes **5–8 minutes** for the patient — and delivers a richer profile than a 20-minute coordinator intake call.

Every lead arrives with a *full clinical picture*

- ♦ **Golden Ratio Analysis** — facial thirds, fifths, nasal width, Goode's ratio
- ♦ **Symmetry Scoring** — eye symmetry, nasal deviation, overall harmony score
- ♦ **Guided Photo Capture** — front, left profile, right profile with angle calibration overlay
- ♦ **Client-Side Quality Check** — blurry or misaligned photos rejected before upload, no wasted AI credits
- ♦ **Procedure Recommendation** — AI matches patient data to procedures your clinic offers

Sample AI Output — Rhinoplasty Candidate

Nasal Width Ratio	0.74 (ideal: 0.67–0.72)
Facial Thirds Harmony	88 / 100
Nasal Tip Projection	Goode 0.59
Eye Symmetry	94 / 100
Recommendation	Reduction + Refinement

Analysis generated by AWS Rekognition + custom geometric models.
Delivered to the clinic dashboard before the first phone call.

LEAD INTELLIGENCE

Every lead is *scored & prioritized* automatically

LEAD SCORE COMPONENTS

Timeline to surgery	30%
Budget alignment	25%
AI harmony score	20%
Photo quality	10%
Chief concerns depth	10%
Referral source	5%

PRIORITY TIERS

 **Urgent**

Score 80–100

Budget ≥\$15k, surgery within 3 months, high clinical match

 **High**

Score 60–79

Strong intent, realistic timeline, good photo quality

 **Medium**

Score 40–59

Interested but exploring. Nurture candidate.

 **Standard**

Score <40

Early research phase. Low urgency follow-up.

CLINIC COORDINATOR EXPERIENCE

Everything your team needs, *before the first call*

- ♦ **Priority Queue** — Evaluations sorted Urgent → High → Medium → Standard. Your team always calls the right person first.
- ♦ **Patient Clinical Brief** — Full history: quiz answers, photos, AI analysis, procedure match — all in one view.
- ♦ **Magic Link Access** — Coordinators access patient profiles securely via email link. No passwords shared, full audit trail.
- ♦ **Status Tracking** — Mark as Contacted / Booked / No-Show / Not a Fit. One click, fully synced to CRM.
- ♦ **Notes & Follow-Up** — Add coordinator notes and set a follow-up date directly in the profile.
- ♦ **Real-Time Notifications** — Email alert with lead score & priority as soon as an evaluation is ready.

Sample Notification Email

FROM: NO-REPLY@AESTHETICA.I.COM

● **New Evaluation — Urgent Lead**

Patient: María G.

Procedure: Rhinoplasty

Lead Score: 91 / 100

Timeline: Within 3 months

Budget: \$12,000–\$15,000

WORKS WITH YOUR EXISTING STACK

Plug into any website. *Sync to any CRM.*

EMBED WIDGET

One line of code. Add the AestheticAI intake widget to any page on your existing website — no rebuild required. Fully white-labeled to match your brand.

CALENDAR BOOKING SYNC

Consultation bookings sync directly to your calendar system — patients can self-schedule as part of their intake journey.

CRM WEBHOOKS

Automatic lead delivery to **Nextech**, **PatientNow**, **HubSpot**, and any CRM that accepts webhooks. Zero manual data entry.

MULTI-LOCATION READY

Run multiple clinic locations under one account. Each location has its own procedures, branding, team, and patient queue — with consolidated reporting.

Setup takes **under 30 minutes**. Our team handles onboarding, widget installation, and CRM connection for you.

SECURITY & COMPLIANCE

Built for healthcare. *HIPAA-compliant by design.*

PHI ENCRYPTION

All patient names, emails, and phone numbers encrypted at rest with AES-256-GCM. Never stored in plain text.

SECURE PHOTO STORAGE

Photos stored in AWS S3 with KMS key management. Access only via time-limited signed URLs (15-min expiry).

IMMUTABLE AUDIT LOG

Every PHI access is logged — who viewed it, when, from which IP. Required for HIPAA compliance audits.

BAA READY

We sign a Business Associate Agreement with every clinic. Your patients' data is protected under HIPAA at every layer.

- ✓ TLS 1.3 in transit
- ✓ AWS HIPAA-eligible infrastructure
- ✓ Role-based access control
- ✓ Patient HIPAA consent captured & timestamped
- ✓ No PHI in webhook payloads
- ✓ Magic link access (no shared passwords)

WHAT THIS MEANS FOR YOUR BUSINESS

More conversions. *Less overhead.*

PATIENT
COMPLETION
TIME (MOBILE-
FIRST)

For your coordinators: Instead of spending the first 20 minutes gathering history, they open a fully prepared clinical profile and go straight to scheduling.

For your surgeons: Every consultation starts with a pre-op brief — photos, analysis, chief concerns, and procedure match — prepared before they walk into the room.

A consultation experience that *builds trust before day one*

- ♦ **Guided & Educational** — Patients learn about their procedure options in a low-pressure, informative flow — not a cold form.
- ♦ **AI Beauty Roadmap** — They receive a personalized analysis of their facial proportions and a preliminary procedure recommendation.
- ♦ **Secure & Private** — No account creation required. Photos never leave the HIPAA-compliant vault. Patients control consent.
- ♦ **Mobile-First Design** — Luxury dark interface, optimized for iPhone and Android. Works in the browser — no app download.
- ♦ **Transparent Process** — A "What happens next" confirmation screen sets expectations: when they'll hear back, what the consult looks like.

Patient Journey Steps

- ① Clicks widget on your clinic's website
- ② Selects procedure (Rhinoplasty, BBL, Facelift...)
- ③ Completes 8–12 adaptive questions
- ④ Captures 3 guided photos with angle overlay
- ⑤ Signs HIPAA consent, confirms contact info
- ⑥ Receives confirmation + Beauty Roadmap preview

PROCEDURE COVERAGE

One platform. *Every procedure you offer.*

FACIAL PROCEDURES

Rhinoplasty

Full AI analysis: Goode's ratio, nasal width, tip projection, symmetry

Facelift

Skin laxity assessment, facial thirds analysis, age correlation

BODY PROCEDURES

Liposuction 360

Body landmark detection, area mapping, candidacy scoring

BBL & Breast Augmentation

Profile capture, proportion analysis, size guidance module

AI Beauty Roadmap (Phase 3)

Coming in Phase 3: patients receive a personalized PDF report with their proportion analysis, AI-recommended procedures, and educational content — before the consultation. Your clinic's branding on every page.

AI Simulation Preview (Phase 3)

Generative AI morphing previews for Rhinoplasty and Breast Augmentation. Patients see a realistic potential result before booking. Clearly labeled: "AI Visualization — Not a Guarantee."

PRICING

Simple plans that *grow with your clinic*

STARTER

\$299/mo

- ♦ 1 procedure type
- ♦ Up to 50 evaluations/month
- ♦ AI photo analysis
- ♦ Lead scoring & priority queue
- ♦ Coordinator dashboard
- ♦ Email notifications
- ♦ Webhook to 1 CRM

Growth

MOST POPULAR

\$699/mo

- ♦ 5 procedure types
- ♦ Up to 200 evaluations/month
- ♦ Full AI suite + Beauty Roadmap
- ♦ Advanced lead scoring
- ♦ Pre-op clinical brief PDF
- ♦ Multi-user team access
- ♦ All CRM integrations
- ♦ Calendar booking sync

PRO / WHITE-LABEL

Custom

- ♦ Unlimited procedures
- ♦ Unlimited evaluations
- ♦ AI simulation previews
- ♦ Multi-location support
- ♦ Full white-label branding
- ♦ Custom domain (your URL)
- ♦ Dedicated onboarding
- ♦ SLA + priority support

All plans include BAA signing, HIPAA-compliant infrastructure, and onboarding assistance. No setup fees.

PILOT PROGRAM — LIMITED AVAILABILITY

Be among the first clinics to use *AestheticAI*

We're onboarding a select group of pilot clinics at a **discounted rate** in exchange for feedback that shapes the product. Pilot partners receive white-glove setup, direct founder access, and the ability to influence the roadmap.

FAST ONBOARDING

Up and running in under a week. We handle everything.

DIRECT ACCESS

Dedicated Slack channel with the founding team.

SHAPE THE PRODUCT

Your feedback drives our sprint priorities.

THANK YOU

Ready to turn your website into a *lead machine?*

AestheticAI replaces your contact form with a full clinical intake engine — scoring, qualifying, and delivering ready-to-call patients to your team 24/7.
